

ITMC Practice Test Questions and Answers

1. Why is safety compliance monitoring important?

- A) It increases the cost of operations
- B) It ensures continuous monitoring of safety practices and compliance
- C) It eliminates the need for safety reporting
- D) It focuses only on operational efficiency

2. Why is electrical wiring insulation important?

- A) It makes the wires more flexible
- B) It prevents short circuits and protects from electrical hazards
- C) It increases the energy consumption of the system
- D) It allows the system to operate without fuses

3. What is the role of fuses in electrical systems?

- A) They increase the power output of circuits
- B) They break the connection in case of overcurrent, protecting the system
- C) They allow circuits to function at maximum load continuously
- D) They reduce energy consumption

4. What is the purpose of electrical load balancing?

- A) It reduces the number of circuits needed in the system
- B) It ensures an even distribution of electrical load to prevent overloads
- C) It increases the power output of circuits
- D) It makes the electrical system run more slowly

Answers: 1-B 2-B 3-B 4-B
