

PADI Practice Test Questions and Answers

1. When I move downward, my wet suit will

- A) grow (feel thicker) as a result of the water's pressure, losing my warmth and buoyancy.
- B) I will get thinner due to the pressure of the water, losing my buoyancy and warmth.
- C) neither the warmth nor the thickness from the water pressure will change.
- D) expand (feel thicker) due to the pressure of the water, providing me with warmth and buoyancy.

2. What is a 'fin pivot' exercise designed to teach divers?

- A) How to use fins for propulsion in currents
- B) How to control buoyancy through breath alone while resting on fin tips
- C) How to perform an emergency fin removal underwater
- D) How to ascend safely using only fin kicks

3. Decompression sickness (DCS) is more likely to strike me if I:

- A) I have a dive computer with me.
- B) dive in choppy seas, with strong currents, and low visibility.
- C) Do not take care of my gear.
- D) dive when you're dehydrated, sick, cold, or hurt.

4. What is the minimum age to enroll in the PADI Rescue Diver course?

- A) 12
- B) 14
- C) 15
- D) 18

Answers: 1-B 2-B 3-D 4-B
